

ELGIN & HALL[®]

BRITISH MADE

HEATING HOMES FOR GENERATIONS

Welcome

An Elgin & Hall fireplace could easily be the most rewarding addition you make to your home and its value. Since the foundation of our parent company in 1963, we have successfully continued to grow from our base in the North East of England. Every design is lovingly created here in the UK.

Over 56 years of continuous innovation and development has provided us with a collection of fires and fireplaces to suit any interior and lifestyle, whilst always adhering to our founding principles of elegance and simplicity. This timeless quality means your chosen fireplace will always be comfortably in agreement with your tastes in furnishing and décor.

You can rest assured that our gas and electric fires are engineered, produced and tested for peak performance and reliability.

Our surrounds are designed to keep up with changing lifestyles and include features which only we can produce thanks to our investment in the latest machinery.

At the same time, we depend on our craft skills to hand finish and polish each marble, limestone or timber piece to perfection. It is this balance of innovation and heritage that makes your Elgin & Hall fireplace uniquely special.

As part of the BeModern® Group we manufacture a range of product in house, to include, surrounds, fires and fireplaces in marble, limestone and timber, as well as steel and cast stoves. Our bathroom range suits both the traditional and contemporary home.

Our Commitment

Highest Standards of Quality BeModern® furniture suppliers manufacture a world class product and continuous investment means we are recognised as the industry leader:

- Operating to ISO 9001:2015 accreditation
- Working closely with our supply partners to maintain the highest quality of raw materials.
- Investing in new technologies to provide innovative solutions.

Our CSR Policies

We are aware that global climate change threatens the wellbeing of the natural environment and society. Whilst governments around the world move to agree on cutting greenhouse emissions, as a British manufacturer BeModern® works to minimise our own carbon footprint, cut emissions, reduce waste, recycle and reap the benefits of new, green ways of running a manufacturing business.

Responsible Manufacturing

We are dedicated to minimising the environmental impacts of our manufacturing activities and seek to explore new ideas through eco innovation, for example our 2010 investment of over £1m in an eco-boiler to convert all waste timber into heat for our factories.

Environmental Management

Having been accredited with ISO 14001:2015, the internationally recognised environmental management standard, BeModern® is committed to continually improving the effectiveness of our environmental management system.

Transport

BeModern® logistics department makes thousands of deliveries each year, providing us with an opportunity to reduce the carbon footprint through regularly modernising our fleet to minimise noise and air pollution and training drivers in fuel efficient, safe driving.

FSC® Timber

Wood is a significant material used across many BeModern® products. As demand for forestry products continues to grow, BeModern® plays its part in conservation by selecting over 75% of its raw timber from well-managed FSC® (Forest Stewardship Council®) recognised forests and holds full Forest Stewardship Council chain of custody certification.

1964

2021

Our history so far

1963

Business starts as **Modern Trends** manufacturing fire surrounds in Hendon, Sunderland from a 5000sq.ft factory

1964

Business incorporated as BeModern®

1967

Expansion of BeModern® leads them to move to larger premises in Nile Street, South Shields

1970

Continued expansion leads to purpose built premises in Western Approach, South Shields

1982

BeModern® moves into the retail sector with the acquisition of Academy Crafts selling kitchen furniture

1988

BeModern® celebrates 25 years as a British manufacturer

2001

BeModern® acquires current Shaftsbury Avenue site and commences manufacture of marble surrounds (later extended in 2004 & 2013)

2006

BeModern® acquired design and product rights of **Elgin & Hall** - manufacturing hand painted, individually crafted fire surrounds in our Marcraft factory

2009

BeModern® acquires **Broseley** in Shropshire, to extend product choice into multifuel, woodburning, electric and gas stoves (later moved to Jarrow Head Office 2019)

2012

Broseley Stoves now manufactured at our Shaftsbury Avenue site

2013

BeModern® celebrates 50 years as a British manufacturer

2014

BeModern® headquarters move from Western Approach in South Shields after 44 years to Bedesway Jarrow after a major £1m makeover

2018

Elgin & Hall's Pryzm range is developed and released

2019

BeModern® successfully exhibit at the Hearth & Home show with a vast range of new product

2020

Elgin & Hall will continue to develop first class product and remain at the forefront of the fireplace industry

2021

Pryzm range is developed further and the Arleon fire range is released

Micro Marble Surrounds

Micro marble is a reconstituted mix of real marble pieces which are crushed and compacted together using resin to ensure a smooth surface finish.

This beautiful material has to be seen to be believed and to be fully appreciated first hand. The craftsmanship we devote to producing fireplaces in our UK workshops is matched by innovation.

Limestone Surrounds

To create a graceful Limestone centrepiece, the quarried stone is expertly selected, cut, carved and smoothed to give your room a splendid feature. Limestone has been sought after down the ages due to its adaptability.

Our Limestone surrounds are manufactured from natural stone resulting in natural variation; this can include shading, veining, crystal markings and fossils. Therefore the Limestone surround you purchase may differ slightly from that shown in this brochure and have its own unique markings. This is the beauty of a natural stone product.

Caring for Limestone

Limestone needs special care and attention. It can stain and is sensitive to acids such as citrus juice, vinegar and household cleaning chemicals.

- Use a mild, neutral cleaner
- Avoid chemical cleaners, wax or polish
- Simply clean with warm water

Micro Marble Gas Fireplaces

Pre-Cast or Standard flue solutions

We have engineered a way to fit our highly desirable gas fires into the standard 16 x 22" opening in a UK chimney breast or pre-cast flue, with no building work.

Whichever you prefer, the installation is all the more simple because all the fireplaces are made as a complete single unit. It has taken years of research to develop and perfect this innovative technology which puts Elgin & Hall a step ahead of the market.

Micro Marble Electric Fireplaces

With a style as beautifully different as the décor and furniture you seek to match, our micro marble electric fireplaces are as individual as you are. Offering 2kW of efficient heat and instant warmth, the flickering flame effect adopts the latest LED technology to produce a play of warming fire like tones that are both realistic and cost effective.

22" Fire Switch Option

A selection of our electric fireplaces now come with multiple fire options. Look for the 22" Switch symbol within the inset electric fires section, from page 68. Bespoke your fireplace to your home.

Flame effect

The flame-effect-only setting gives the impression of radiant logs and flickering flames with a choice of three flame effects and brightness levels without the added heat; perfect for warmer nights. The latest LED technology produces a play of warming fire like tones that are both realistic and cost effective.

Flat to wall fix

This amazing transformation can be fitted in half a day at the most. Because it's electric no chimney or recess is required. It's just a case of simply plugging it in... and let the magic begin.

Timber Electric Fireplaces

Our timber electric fireplaces offer the ultimate convenience; they can be installed against any flat wall in any room. These innovative designs are a desirable centrepiece and the 2kW performance provides instant heat when you arrive home, which can supplement the central heating or allow you to heat just one room when the weather is on the cool side.

Inset Gas Fires

Once you've selected your new surround, you may choose to give it a warm glowing heart with an Elgin & Hall gas fire.

Our gas fires are controllable and convenient to operate with a discreet Smartslide control mounted on the top side or a manual control and igniter located behind the fret - flame height and heat output is at your control.

Warranty

We provide a 5 year Warranty* so you can be confident you have purchased and installed a high quality product.

*Terms & conditions apply.

Installation

Current regulations stipulate that all gas fire installations must be carried out by a Registered Gas Safe Engineer.

For information and advice on a Gas Safe Engineer, please contact your local Elgin & Hall retailer.

Servicing

We recommend that all gas fires are serviced annually by a Registered Gas Safe Engineer to ensure continued operation and optimum performance.

This annual service is a condition of our 5 year warranty, and you must be able to show a record of approved servicing to be able to make a claim.

Safety Assurance

Flame Failure Device

All of our gas fires are fitted with a flame monitoring device ensuring that in the event of the flame going out during its operation, the gas supply to the fire is instantly cut off.

Oxygen Depletion Sensor

For your safety, all our gas fires are fitted with an Oxygen Depletion Sensor. This will shut off the gas supply if the oxygen level in the room is too low or if there is a blockage in the chimney or flue.

Quality Approved

All Elgin & Hall fires are manufactured in accordance with internationally recognised Quality and Environmental Management System Standards ISO 9001:2015 and ISO 14001:2015 guaranteeing responsible working and product quality.

Accessories

Xtra Canopy

The Xtra canopy kit* "tunes" the appliance to your flue to raise the efficiency by up to 8% on an open fronted fire.

*Available on Slimline or Deepline Radiant models only

Spacer Kit

The spacer kit fits to the rear of the fire to reduce the depth by 25mm. It is ideal for use with pre-cast flues.

Handle Options

An easy grip* attachment allows those with restricted movement to control the ignition & heat.

Matching colour handles are available in Brass & Chrome. A Black Smartslide handle is supplied as standard with Smartslide models.

*Easy grip handle not suitable for Chollerton gas fire.

Super Controllable

Smartslide Control

The discreet Smartslide control mounted at the top right hand side makes your Elgin & Hall gas fire convenient to operate. To turn the fire on simply press down and release.

Likewise you can turn the fire off by lifting to its top position. The control's second function is to regulate the flame height and heat output.

Smartslide controls give you the freedom to change the fire picture from smouldering to blazing at a touch to suit your mood and desired room temperature.

Manual Control

All our open fronted gas fires are available as manual control. Neatly concealed behind the fret, these controls allow you to regulate your heat output and flame setting before replacing the fret for a sleek finish.

The various types of flue and chimney require different size specifications of gas fire.

Whichever kind your home has, there is an Elgin & Hall gas fire to fit.

Gaze over the next few pages and you will easily identify which one is suitable for your home.

Consider the fit

All of our gas fires require a chimney or flue to conduct expended gases to the exterior. To identify which type your house has and which model of fire will fit (slimline, mid-depth or deepline), check the simple descriptions below.

Brick Chimney Flues Class 1

Easily recognisable from the stack above the roof line (usually with a pot or gas terminal).

Once the fire is sealed into the chimney cavity, any harmful gases are expelled up the chimney itself and out of the roof. Any of our gas fires can be installed here.

Pre-Fabricated Flues Class 2

Identifiable by a metal flue and terminal on the roof, this flue system is suitable for all our gas fires. Piping from your flue right down to your fire transports the gasses from the fire and out of the house. Again this flue is suitable for installation with any of our gas fires.

Pre-Cast Flues

Recognisable by a ridge vent on the roof line, and built from concrete or clay blocks, usually within the wall cavity, the expelled gasses are vented through this shallow passage and out of the roof. Pre-cast flues are perfect for our Slimline or Deepline * Radiant gas fires.

* Deepline Radiant fire suitable when installed with a 75mm rebated surround.

Balanced Flue

Identified by a round flue installed directly through an external wall. Our balanced flue fire is completely sealed from the front, allowing air to circulate through the flue to the rear of the fire. Cold air is sucked into the fire to combust and the gasses are expelled via the same point. This fire is highly efficient due to its airtight installation and can be installed without a chimney breast.

Choosing the right engine

Open Fronted

Slimline Radiant

Radiant gas fires pull in cold air through their open front, circulating it over the real flames and emitting it back into the room.

Deepline Radiant

Deepline Convector

Hot air is transferred through the canopy to circulate the warmth around the room.

*Includes: Balanced Flue kit

Exclusive Fascia Collection

The framework of the Exclusive trim has a flat face with a long bevelled edge that slopes down towards the fire. The trim is broad and slightly accented in profile to complement the four boldly curving bands of the fret.

In Brushed Steel, Brass, Chrome or Black, the harmony of the trim and fret creates a non-fussy but sympathetic note to a stylish interior.

Available finishes:

Devotion Fascia Collection

The distinguishing feature of this range of designs is the Black finished framework bordering either side of the metal trim. This serves to provide a dramatic contrast which accentuates the Chrome, Brass, Nickel or Brushed Steel finish. The fret itself curves slightly outwards to add extra interest.

Available finishes:

Calleos 800CF

Inset wall mounted gas fire

The Calleos 800CF is one of the most exciting developments in glass fronted gas fires and is suitable for both conventional class 1 and class 2 flues.

Shown here installed with a Slim or **optional extra Wide* trim**, this gas fire fits directly into a fireplace wall for a minimalistic look. The Calleos 800CF features the latest in under-log dual burner technology and is sure to impress with its stunning fuel bed layout and reflective black glass internal panels.

The unique dual burner system allows the fire to be turned to low whilst still retaining an impressive flame picture.

With up to 4.4kW of instant heat, the Calleos 800CF is sure to impress. Indulge in the ultimate luxury and opt for the **optional non-reflective* glass** which will amaze your viewing pleasure, creating the illusion of no glass, simply, crystal clear.

Find your local retailer

Once you have chosen your favourite surround, picked the finest fire and measured up to ensure it will fit, it's time to visit your local showroom.

Admiring these British designed and manufactured fireplaces first hand is the best way to understand their quality and craftsmanship. Why not take paint charts, fabric samples or photos of your room to match with the surrounds.

If you need advice, you can trust the experience of our independent retailers.

To find your local retailer visit our website or call us.

BeModern® | 19/34 Bedesway | Bede Industrial Estate | Jarrow | Tyne and Wear | NE32 3BE

BeModern® hold design copyright and registration of design for its product ranges. BeModern® are continually striving to improve and develop their range of products. It is important, therefore, to check details before ordering as sizes and specifications may change without prior notice. Whilst every effort is made to ensure accuracy and colour, it is not always possible to obtain perfect reproduction because of the materials and printing processes used and you may find that shades, natural grain markings and marble colouring are not consistent. © BeModern® March 2021
