# RIVA2

GAS FIRES

# Everyone is Different

This is why we created such a wide and diverse range of Riva2 gas fires, with so many possibilities. Whether you prefer contemporary or traditional styles, small or large fires, or live in a home with or without a chimney, you can personalise your Riva2 fire to suit your tastes and requirements.

# Relax - it's a Gazco Fire...

When you choose Gazco, quality and innovative technology are assured. From traditional models to contemporary designs, Gazco is committed to creating the ultimate flame-effect gas and electric fires.

Our research and development laboratories are amongst the most advanced in the world, ensuring that the very latest innovations are incorporated into our appliances.

Gazco is an ISO9001 and ISO14001 accredited company. Our rigorous quality control system ensures that all our appliances are safety checked and that they comply with the appropriate regulations, with all fires in this brochure bearing both the UKCA and CE mark. Similarly, our environmental management systems ensure we work in a sustainable manner, whilst endeavouring to protect the environment by minimising any possible impact from our operations.

## Warranty

Your Gazco Expert Retailer will provide you with a Two Year Warranty for your new gas fire. This can be extended to a Five Year Warranty by registering your fire with Gazco. Please note, these warranties exclude certain consumable parts. Fires purchased outside of Gazco's Expert Retailer Network will carry a standard 1 Year non-extendable Warranty, or minimum statutory warranty for your country. Full warranty terms and conditions are available to view at [www.gazco.com](http://www.gazco.com).

**WIN** the cost of your product back!

by registering your product online for your free extended warranty. See page 69 for more details.

We are proud to have been recognised as an award-winning manufacturer, for our high-quality products and innovative technology. Find out more at [gazco.com/awards](http://gazco.com/awards)

# Expert Retailer Network

We take great care to ensure that our fires are designed, tested and manufactured to the highest possible quality and safety standards.

We are equally careful to make certain they are sold and installed correctly so you can enjoy years of pleasure from your fire. Our products are only available from experienced, independent retailers who will be happy to show you a selection of models locally in their showrooms, often fully operational. These independent retailers will discuss your individual requirements both technical (such as sizing the heat output to your room and advising on your flue type) and design, and ensure that you select the most appropriate product for your home.

Our experienced retailers will also be able to advise on, or assist with, the installation process as well as help provide any after-sales support and servicing your appliance may require in the future.

Whilst we encourage our retailers to promote fireplace products and their outlets via the internet, we do not believe suitable levels of customer care and satisfaction can be obtained from purchasing the product only online and we would strongly recommend that you consider this when undertaking your research and making a purchasing decision. Furthermore, please be aware that we do not offer technical support (beyond our statutory responsibilities) to products bought via nationwide online sales, where this support would normally be offered by one of our qualified, independent retailers.

## Find Your Retailer

Find your nearest retailer by visiting: [www.gazco.com/retailers](http://www.gazco.com/retailers)

# Riva2 Fires

Whichever model you decide upon, you can rest assured each fire has been designed in our world-class UK laboratories. Our state-of-the-art technology ensures all Riva2 fires provide high efficiency heating and superb, natural flames at the touch of a button.

*Riva2 600 Designio2 Steel in Graphite with Ledgestone-effect lining.*

## Size Options

### 400

The most compact fire in the Riva2 range, the conventional flue 400 is perfect for standard sized homes with 16" fireplaces and provides 3.8kW of heat at up to 81% efficiency.

**Size (wxh):**  
400 x 388mm\*

### 500

Superbly versatile, the Riva2 500 is designed to suit a variety of interiors. This mid-sized fire is available in conventional or balanced flue options and provides up to 4.9kW of high efficiency heat.

**Size (wxh):**  
550 x 388mm\*

### 500HL Slimline

Designed to be installed in homes without a chimney, the slim depth of the balanced flue Riva2 500HL Slimline allows some of the fire's depth to be housed in a cavity wall. The remaining 75mm depth can be housed in your choice of surround - such as the stylish Esprit (page 24) or a shallow stud-work faux chimney breast.

**Size (wxh):**  
549 x 521mm\*

### 600

The Riva2 600 offers magnificent flame visuals and a versatile, landscape form-factor. Bringing impeccable styling to any interior, this fire is suitable for a variety of homes. Opt for a minimalist Edge fire or choose one of the stylish glass or steel frame options for added presence.

**Size (wxh):**  
594 x 370mm\*

### 600HL

The highly adaptable conventional flue 600HL works equally well in both modern or traditional interiors, thanks to its versatile proportions, which suit standard 22" chimney openings. Whether styled as a contemporary fire or as a magnificent fireplace when coupled with one of Gazco's period stone mantels, you can customise the 600HL to suit your home.

**Size (wxh):**  
600 x 600mm\*

### 750HL

One of the most impressive fires in the Riva2 family, the 750HL provides up to 7kW of high efficiency heat, making it ideal for heating larger spaces. Designed to fit into a standard 36" chimney opening, the Riva2 750HL allows you to make the most of your existing fireplace, with a balanced flue version for homes without a chimney.

**Size (wxh):**  
797 x 713mm\*

\* Sizes given are those visible upon installation when installed as a frameless Edge fire.

## Complete Control

The Riva2 range features a powerful Programmable Thermostatic remote control, which lets you ignite your fire and adjust the flames from the comfort of your armchair. Riva2 fires can also be pre-set to maintain selected temperatures as well as scheduled to turn on at certain times.

## Non-reflective Glass

Many fires in the Riva2 range feature crystal clear non-reflective glass for breath-taking visuals uninterrupted by unwanted reflections. See page 61 for individual fire features.

# Frame & Surround Options

There are a wealth of frame choices available to perfectly complement your Riva2 fire, outlined on these pages and shown in detail throughout the brochure. Each one of these frames offers a unique styling possibility and is crafted from the very finest materials.

Whether your tastes lie with the contemporary or the traditional, you can find a Riva2 frame to suit your interior. Options include a stunning frameless 'hole in the wall' look, sleek glass and steel finishes, striking colour options and a wealth of hand-crafted stone mantels; ensuring whatever your style preference, there is a Riva2 fire for you.

Stone Mantels - see pages 46 - 53

Selected Riva2 400, 500, 500HL Slimline, 600, 600HL & 750HL are versatile fires that can be installed into both contemporary and more traditional interiors. Gazco's collection of six high quality stone mantels and hearths, with additional slip sets, will complement these fires to ensure a grand finish and a timeless fireplace for your home.

\*Requires additional slip sets or back panels. The Riva2 600HL and 750HL slip sets are available from Gazco. Bespoke sourcing will be required for other fires.

# Riva2 500HL Slimline

The Riva2 500HL Slimline offers you the superb flames of the Riva2 range with a versatile slim profile which allows it to be installed into a cavity wall. Suitable for a huge range of interiors, the 500HL's shallow depth means that it can be conveniently fitted into an exterior wall with the internal leaf removed, ensuring a slim footprint and minimising building work. Once recessed into a cavity wall, this Slimline fire protrudes just 75mm into the room and has a choice of finishing options to suit your interior.

*Riva2 500HL Slimline Esprit with EchoFlame Black Glass lining*

## Key Features

1. Choice of frame styles including Esprit surround
2. Large and small sections of Esprit surround can be fitted either above or below fire
3. Shallow firebox depth
4. Balanced flue connection
5. Choice of linings
6. Highly realistic fuel bed
7. Convected heat system outlet
8. Radiant heat
9. Non-reflective glass
10. Programmable Thermostatic remote control\*
11. Rear exit Balanced Flue Termination Kit included\*

\*Not illustrated

## Esprit Surround (see left)

An eye-catching alternative to the Edge or frame styling choices, the Esprit adds a surround that houses the Riva2 500HL's remaining 75mm front facing depth once installed into a cavity wall, minimising building work.

# Riva2 Stone Mantels

*Riva2 600HL Edge with Brick-effect lining and  
Claremont Mantel in Limestone with matching slip set*

# Traditional Style with a Modern Slant...

Gazco's collection of six high quality stone mantels and optional hearths are available in a choice of either Limestone or Antique White Marble, each piece truly unique by virtue of the naturally occurring veining, subtle tonal differences and indeed even small fossils that may be found in the limestone. Each mantel is a beautiful and natural complement to many of the high efficiency fires shown in this brochure and the perfect way to create a grand finish and a timeless fireplace in your home.

Limestone

Antique White Marble\*\*

# Gazco Reflex & Studio Fires

*Reflex 75T Evoke Steel with Graphite front and rear with Ledgestone-effect lining*

*Reflex 105-3 (three-sided fire) with EchoFlame Black Glass lining, with Left Open Corner Ventilation Bar*

*Studio 1 Freestanding Conventional Flue with Black front and matching bench, Log fuel bed and Black Reeded lining*

## Reflex Gas Fires

Delivering the ultimate in realistic flames, Reflex fires provide extraordinary visuals that are almost indistinguishable from a real woodburning fire. Ambience is heightened with each fire's powerful LED ember bed, which provides glowing up-lighting below the flames for added realism.

A range of fire options include single sided conventional and balanced flue models that can be installed with a choice of stylish frames or Gazco's range of classical stone mantels, depending on your preference. For a strikingly bespoke installation, Reflex two and three sided fires grant an unparalleled view of the stunning flames, which can be viewed from almost anywhere in the room. These elegantly contemporary fires allow for a beautifully unique fireplace, whether positioned centrally or as a corner fire.

## Studio Gas Fires

Gazco Studio fires combine eye-catching aesthetics, superb heating performance and versatile installation options to create a stylish, contemporary gas fire range. Suitable for a range of homes with or without a chimney, the Studio collection includes landscape fires and freestanding stoves, as well as Slimline fires for cavity wall installation.

The striking flame visuals of the Studio can be customised with a host of different styling options such as frames and lining options, depending on the model, letting you tailor your fire to your tastes.

Further information about these exciting ranges can be found in separate, dedicated brochures, which can be requested from your local retailer or viewed online at [www.gazco.com](http://www.gazco.com).

# Have you considered electric?

*eReflex 75RW with Oak Log-effect,  
shown with Claremont Limestone mantel*

*eStudio 135R. Shown with optional Mood Lighting Kit.*

In addition to the wide selection of gas fires shown in this brochure, the Stovax Heating Group is pleased to offer a vast portfolio of electric models with superb flame visuals and breath-taking realism that can be controlled from the comfort of your favourite chair.

Offered in a wealth of styling options, these fires feature the very latest technology with realistic flames for a versatile and stunning focal point in any home – all without the need for a chimney!

From our luxury Onyx Avanti electric fire collection, to the versatility of the Gazco eStudio or eReflex ranges, each model can be enjoyed with or without the heat for year-round ambience.

Available in frameless inset options, options to suit matching classic stone mantels, or multi-sided versions, there is a design to suit every home.

---

For more information, visit [www.gazco.com/electric](http://www.gazco.com/electric),  
or speak to your local retailer.

*Onyx Avanti 190RW with Split Oak Log-effect, installed as a three-sided fire. Shown with optional Mood Lighting System.*

# Your Home and Flue Requirements...

## Conventional Flue

Conventional flue systems are easily recognisable as either a conventional brick or stone chimney, or as a pre-fabricated chimney system. Should your home have neither at present, it is usually possible to have a pre-fabricated system installed in your home if required.

### Brick/Stone Chimney

(Class 1)

The chimney stack rises well above the roofline and is topped by a traditional chimney pot or gas terminal. This type of chimney relies on the natural circulation of heated air to expel the products of combustion up your chimney.

### Pre-fabricated Flues

(Class 1 & 2)

You will see a metal flue cowl on your roof. Some are all metal whilst others may terminate through a short rectangular pot (but without a chimney stack). These flues create the same circulation of heated air as a brick or stone chimney.

## Balanced Flue

Balanced flues work in conjunction with Gazco's Glass Fronted gas fires only. The appliance is completely sealed from the room into which it is installed (so there are no draughts and heating efficiency is increased) and a twin-wall pipe vents directly to an outside wall.

### Balanced Flue

(No chimney required)

Air for combustion is drawn in through the outer pipe whilst the inner pipe removes the combustion gases to the exterior of the property. Depending on the fire selected, the twin-walled pipe may exit horizontally through an external wall or vertically through the roof. Gazco offers a comprehensive range of balanced flue system components. Please refer to our dedicated Concentric Flue System brochure which can be requested from your retailer or viewed online at [www.gazco.com](http://www.gazco.com).

## No Air Vent Required (UK)

All fires shown with this symbol have the advantage of not normally requiring an air vent\*. Please discuss this in full with your local retailer.

\*Requirements in the Republic of Ireland are different.

*Riva2 750HL with Ledgestone-effect lining and Victorian Corbel Mantel and Hearth in Limestone with matching slip set.*

## RIVA2 500HL SLIMLINE DIMENSIONS (mm)

## RIVA2 500HL SLIMLINE ESPRIT SURROUND

When installed into the inner leaf of a cavity wall, the front face of the appliance will require a 75mm (3") rebated surround complete with a finishing slip to house the remaining appliance depth. Alternatively, a slim studwork chimney breast could be constructed and the appliance can then either be finished as an "Edge" installation or finished with the Verve XS frame. The appliance is also suitable for installation into a cavity wall in conjunction with the Esprit front which will house the remaining depth.

## TYPICAL INSTALLATION FOR ESPRIT SURROUND

## TYPICAL INSTALLATION FOR EDGE & VERVE XS

## REAR EXIT BALANCED FLUE TERMINATION KIT

The Riva2 500HL Slimline comes complete with a specific rear exit balanced flue termination kit (8526) included.

395 x 200 x 200 mm (H x W x D) Guard supplied. Cut to length as required on site.

Your retailer will be able to advise on your specific requirements.

# WIN the cost of your product back!\*

For further home inspiration you can **view real life installations** at our Customer Showcase page and share your thoughts and photos of your new stove or fire installation to enter our draw!

- We will publish your entry on our Customer Showcase
- You will be entered into a draw for the chance to win the cost of your product back
- **Gain a second entry** by registering your product online for your free extended warranty at [gazco.com/registration](http://gazco.com/registration)

"It creates a fabulous cosy feel in the winter"

"We are still over the moon that we won the competition"

"So pleased we chose this gas alternative to a log burning stove"

"It's so easy to start up, with a press of a button!"

"Perfect for those cosy nights in"

View real life installations and submit your review at [gazco.com/customershowcase](http://gazco.com/customershowcase)

\* Terms and conditions apply. See online for details

# Important Information

## Technical Specifications

All specifications given in this brochure are approximate. Actual specifications for each individual product will vary according to model. Your Gazco retailer will be pleased to provide any further information you require. Alternatively you may view or download specification sheets from [www.gazco.com](http://www.gazco.com)

## Installation and Safety

Gazco gas fires must be fitted by a qualified gas installer (Gas Safe registered in the United Kingdom or RGII registered in the Republic of Ireland) who should also verify the proposed site conditions are fully suitable for the product selected. Complete installation instructions for many models can be obtained prior to purchase by viewing or downloading them from [www.gazco.com](http://www.gazco.com). Please note that all parts of these fires, particularly the glass panel in the door, become extremely hot during operation and can result in serious injury and burns if touched. It is therefore recommended that a fireguard complying with BS 8423:2002 is used in the presence of young children, the elderly or infirm.

## Colours/Flame pictures

Owing to variations in studio lighting and printing inks, the finishes/colours of fires illustrated in this brochure may differ slightly from actual models. Before purchasing, please ask your retailer to show you finish/colour samples. Whilst all the flame pictures shown in this brochure are of actual fires, flame pictures may vary depending on the installation, flue conditions and geographical/surrounding features that may effect the efficiency of the flue.

## Care and maintenance

Traditional materials, such as polished steel and brass, tarnish on contact with air, especially when also exposed to heat. To help minimise this effect, we recommend fires receive regular treatment with suitable proprietary cleaners. Additionally, please remember that gas fires will require servicing annually by a qualified gas installer Gas Safe registered in the United Kingdom or Bord Gáis registered in the Republic of Ireland).

## Warranty and Product Improvement

Your Gazco Expert Retailer will provide you with a Two Year Warranty for your new gas fire. This can be extended to a Five Year Warranty provided your fire has been registered with Gazco. The second and subsequent years are dependant on the appliance being serviced 12 months after installation and annually thereafter and exclude certain consumable parts. Fires purchased outside of Gazco's Expert Retailer Network will carry a standard 1 Year Non-Extendable Warranty, or minimum statutory warranty for your country. Full warranty terms and conditions are available to view at [www.gazco.com](http://www.gazco.com).

Gazco pursue a policy of continuous product improvement, therefore, whilst our products are correct at the time of the photography, we reserve the right to make alterations and amendments. Exact product details should be discussed with your retailer at the time of purchase.

## Air Ventilation for Gas Fires

To comply with gas appliance installation regulations, the Riva2 750HL conventional flue requires additional ventilation into your room. For further information, please consult either your Gazco retailer or the Gazco Technical Information on our website [www.gazco.com](http://www.gazco.com) to confirm the ventilation required. All other fires featured in this brochure do not require additional ventilation.
