ECLIPSE
60HL GAS FIRES

onyx

Fires to Eclipse all others

The Eclipse 60HL is the very pinnacle of gas fire innovation. Delivering unparalleled flame visuals using state-of-the-art technology and a remarkably realistic Split Oak log-effect, these deluxe inset gas fires create a truly awe-inspiring focal point.

As part of the Stovax Heating Group, Onyx is the culmination of over 40 years of experience designing and crafting best-in-class, award-winning products. Find out more at onyxfires.com/awards

Unparalleled flame visuals

Rolling, wrap-around flames engulf the log-effects, emulating the multi-dimensional nature of a woodburning fire.

ECHOFLAME™
BLACK GLASS LINING

NON-REFLECTIVE
GLASS 

IMMERSIFLAME
Triple Burner Architecture

ImmersiFlame

New and exclusive to the Eclipse is the ImmersiFlame triple burner architecture. Concealed burners within the raised Split Oak log-effects create spectacular flames that appear from within and envelop them, mirroring the immersive display you'd expect to find only in a traditional woodburning fire.

EchoFlame™ Black Glass Lining

To enhance the true-to-life log fire ambience, the Eclipse Gas Fires feature our elegant EchoFlame™ Black Glass Lining. This provides a reflective backdrop that adds further depth and layers to the mesmerising flames, creating an unrivalled gas fire experience.

Premium non-reflective glass

For a crystal-clear view of the stunning rolling flames and detailed log-effects, Eclipse fires feature Onyx's premium non-reflective glass. This works to keep the glass glare free, ensuring that your Eclipse is the stunning focus of even well-lit rooms.

Exquisite design

The Eclipse is a versatile choice for both contemporary and traditional homes. The ability to be hearth mounted allows for installation within a stone mantel or an existing fireplace feature, creating a stylish centrepiece no matter your style. Every part of the Eclipse has been thoughtfully designed and crafted. Strikingly realistic Split Oak log-effects have been meticulously hand painted, making them almost indistinguishable from natural wood.

The minimalist Edge+ frame is available as an optional extra, pairing beautifully with this fire and creating an effortless smooth finish to the recess, for a sleek aesthetic and added installation ease.

Key Information

Heat Output	Efficiency	Efficiency Class	Models	Flue Type
5.1kW	up to 78%	D	Natural Gas or LPG	Conventional

Complete control

Eclipse Gas fires benefit from a compact, completely integrated control system with a fully sequential thermostatic remote control. This puts ignition, flame adjustment, heat output and extinguishing right into the palm of your hand, and can keep the room at the temperature you desire.

Ergonomic design

The ergonomically designed remote control has the added benefit of a grip-lock safety feature, with sensors that activate the remote only when you are cradling it in your hand. This ensures your Eclipse cannot be accidentally switched on or operated, adding an extra layer of safety.

Timer Mode

Featuring a handy timer mode that lets you 'set and forget' your Eclipse fire, you can simply set it to your chosen time and the remote will take care of the rest, letting you relax and enjoy the fireside ambience!

Thermostatic Mode

Set your desired temperature with the remote and your Eclipse will adjust its heat output to maintain this temperature, ensuring your room is always kept comfortable.

Experience the exceptional

When you choose Onyx, you are choosing more than just a fire or stove. You are choosing the pinnacle of British innovation and quality. You are choosing prestige. As part of the Stovax Heating Group, Onyx represents the pinnacle of more than four decades of British design and engineering expertise. Every fire and stove is born in our state-of-the-art research and development laboratories, and incorporates industry leading technology and design.

The Stovax Heating Group is an ISO9001 and ISO14001 accredited company. Our rigorous quality control system ensures that all our appliances are safety checked and that they comply with the appropriate regulations, with all fires bearing the CE and UKCA mark.

The Onyx promise

Your Onyx retailer will provide you with a Five-Year Warranty for your new gas fire providing it is registered with Onyx. Please note, this warranty excludes certain consumable parts. Fires purchased outside of Onyx's Expert Retailer Network will carry a standard One-Year Non-Extendable Warranty, or the minimum statutory warranty for your country. Full warranty terms and conditions are available at:

All dimensions are in mm

Installation & Safety

Onyx gas fires must be fitted by a qualified gas installer (Gas Safe registered in the United Kingdom or Board Gas registered in the Republic of Ireland). Please note that all parts of these fires become extremely hot during operation and can result in serious injury and burns if touched. It is therefore recommended that a fire-guard complying with the current version of BS 8423 is used in the presence of young children, the elderly or infirm.
